

Dora Young Split Ring Using Two Colours © Jane Eborall 2009

Below is a description of a technique originally shown by Dora Young. As it was originally shown in one colour only I have taken it upon myself to show the possibilities of this technique using two colours. As you can see by my trial piece split rings can be made in one colour or in the regular way using two.

Make a SR as usual. 6 / 6 CI SS

See Fig. 1

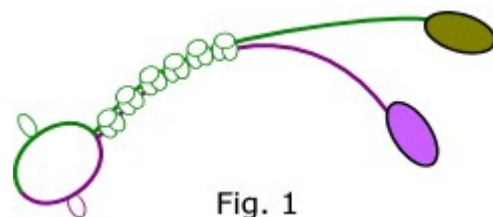

Fig. 1

Make Chain of 6 using SH2 SLT

See Fig. 2

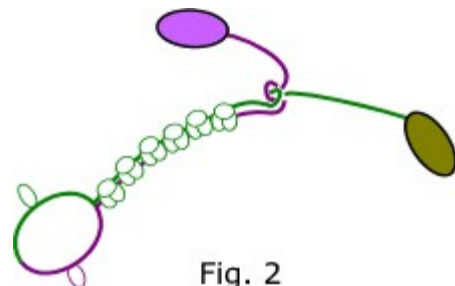

Fig. 2

Now join SH1 thread (lock/shuttle join) to the beginning of the chain leaving sufficient thread to work the second side of this 'mock' SR.

See Fig. 3

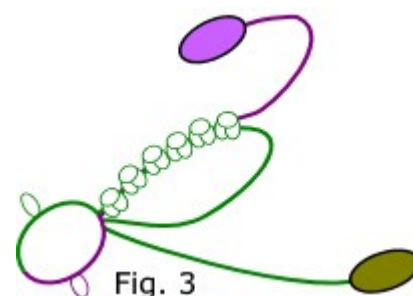

Fig. 3

Now make a split chain back along the new core thread [using this method](#). Also see below - Figs. 4 & 5.
