

Notes on Dora Young page 19

Joining Dora's motifs on page 19

Although instructions are given on the joins for this motif I found them quite confusing so have written them down the way I understand them.

Make the first 'side' of the final round of the new motif.

After the chain of 4 ds lock join to the next picot of the previous round of this motif.

Using the chain thread join to the same picot AND join to the corresponding picot of the previous motif worked. To do this pull the chain thread through both picots (the one on the 'old' motif and the one on the current motif) and put the shuttle through the loop made.

Next make the first half only of a double stitch (SS in Dora's instructions).

Join to the next picot on the previous motif and the one on the motif you're working on as before.

Continue until the last picot has been joined (and SS worked) on the current round of this motif.

Join to remaining picot on previous motif then make another chain of 4ds. Continue round the motif finishing as usual.
