This doily measures 14" in diameter when worked with a size 40 thread.

Please visit these two links for further information on the source of this pattern. [History](#). [Prefaces to the three books that I have](#). I will maybe add more to this link in the future.

Abbreviations

R	ring	Ch	chain	SS	switch shuttles	RW	reverse work
Lj	lock join	+	join	vsp	very small picot	DNRW	do not reverse work

SPCh spiral chain - make the first half of the ds five times then pass the shuttle underneath both threads. So for SPCh 3 x 5 make 3 sets of 5 half doubles. [See this link for further help](#).

Note - for those who prefer front side/back side tatting the text in *italics and red* indicates where the worker needs to use the second half of the ds first.

Centre Ring - two shuttles CTM

R: All picots are 5mm in this ring 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 (11 picots) CI & continue to round 1

Ch: 4 - 4 RW

R36: 3 - 3 + (R1) 3 - 3 CI RW

Third round - 1 shuttle and chain thread

This round is the same as round 2 except that the large rings

join to round 2 chains with one ds between joins - see rings 2 & 5 on Fig. 3

Fourth round - NB this round is worked in an anticlockwise direction.

R1: 3 - 3 - 3 - 3 CI RW
