

Taken from Gina's blog post on February 9th 2005:-

"Georgia put out a call for heart patterns - so a list could be compiled before Valentine's Day. I got out my Netted Hearts....designed in my earlier tatting days. It was actually a stab at the mignonette stitch. Anyway, the earlier versions were a bit embarrassing so I reworked the first one....still not entirely happy with it."

[Click here](#)

2 shuttles wound CTM both full size 20 thread

R = ring Ch = chain smr = small ring
rw = reverse work - = picot + = join

sp = thread space

X = number of times to

repeat []

Begin with Ring A:

R 6-3-3-6, rw

Ch 6-3-3-3-3-3, rw

R(B) 6-9 + middle p on RA, 9 - 6

R(C-F) [6 + p of prev r, 9-9-6] 4 X, rw

Ch 3 + p at opposite ch, 3-3-3-3-6, rw

RG 6 - 3 + middle p of RF, 3 - 6, rw

Ch 6 + last p RG

[Ch 3-3-3-3, + free p on next large R] 3 X

Ch 3-3-3-3, + p on RA

Ch 6, + base of RA, rw

Working with one shuttle only, the small mignonette rings are made from here on. Drop ring shuttle and use the chain shuttle. Leave a small thread space. Most thread spaces will be approximately $\frac{3}{8}$ " but this one should be $\frac{1}{4}$ " or less.

[Smr 3, + next p on ch, 3, rw, sp ($\frac{3}{8}$ " until stated differently), smr 3-3, rw] repeat around (12 times total) to last p on ch, sp only $\frac{1}{4}$ " or far enough to + to base of RA, rw

Another sp ($\frac{1}{4}$ ") smr, sp ($\frac{1}{4}$ "), + smr from prev rnd (all joins are lock joins now)

[Sp ($\frac{3}{8}$ " again until stated differently) smr 3-3, sp, + next smr below] continue around to + in last smr,

Sp ($\frac{1}{4}$ ") smr 3-3, sp ($\frac{1}{4}$ ") + to base of RG, rw

Using both shuttles now to chain. The ring shuttle is now the chain or ball thread & other is working shuttle.

Ch 3-3 + p of prev smr

[Ch 3-3-3-3-3, + p of next smr] 5 X

Ch 3-3-3-3-3, using ch shuttle, make r 8-8, return to using it as chain shuttle (this makes point at bottom of heart)

[Ch 3-3-3-3-3, + next smr] 6 X

Ch 3-3, + base of RA

Finish off and hide ends

Ring A & G detail

Small thread space,

all join in base of ring

Ch 6 segment
