

Abbreviations

R	ring	Cl	Close
vsp	Very small picot	SR	Split ring
RW	Reverse work	+	join

3 ½ yards on each shuttle wound CTM.

Before starting the following diagram should show you how you are joining to part 2. That's the largest of the two pieces you have already worked – if you haven't lost them both!!! Hold part two with the side with 8 picots at the top and the shorter side to the right. This puts you in the correct position to join the first picot on ring one (top right of diagram).

When joining the second side of an SR to a previous picot [this might be a useful link.](#)

- R1: 3 + (vsp SR21 on part 2) 3 vsp 3 vsp 3 Cl
- SR2: 3 vsp 3 / 3 + (vsp SR20) 3 Cl
- SR3: 3 vsp 3 / 3 + (vsp SR11) 3 Cl
- SR4: 3 vsp 3 / 3 + (vsp SR10) 3 Cl
- SR5: 3 vsp 3 / 3 + (vsp R1) 3 Cl
- SR6: 3 vsp 3 / 3 + (vsp SR29) 3 Cl
- SR7: 3 vsp 3 / 6 Cl RW
