

Materials required. Size 20 thread and 2 shuttles with the same thread, 2 size 11 seed beads and extra thread (not necessarily the same colour). The two shuttles should be wound CTM (continuous thread method). The easiest way to do this is to add two size 11 seed beads to the ball thread and wind 4½ yards onto shuttle one. Next pull off another 3½ yards, cut from ball and wind onto shuttle 2. Before starting make sure that the two beads are on the second shuttle.
